The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filled after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 3, 4, 7, 8, 14, 17, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baldwin (U.S. Pat. 5,884,425) in view of Applicant admitted prior art (AAPA).

Regarding claim 1: Baldwin discloses an anti-tamper tag with theft protection comprising a tamper evident label material 45, with an adhesive 28 on a back side, and an RFID transponder 66 adhered to the adhesive (figure 5, col. 7, lines 6-16). Baldwin does not disclose the tamper evident label material is a vinyl with a tensile and tear resistance such that the tamper label material one of tears and breaks upon an attempted removal from a substrate. However, the AAPA teaches the tamper evident label material is a vinyl with a tensile and tear resistance such that the tamper label material one of tears and breaks upon an attempted removal from a substrate (specification, page 3). Therefore, it would have been obvious to the skill artisan to use the conventional tamper label material as an alternative way for purpose of indicating tampering which is an advantage because it's commercially available in the market.

Regarding claim 3: AAPA teaches the tamper evident label material is 3M 7610 Scotch Destructible Vinyl t would have been obvious to use 3M 7610 Scotch Destructible Vinyl (specification, page 3).

Art Unit: 2632

Regarding claim 4: Baldwin discloses a release liner 58 attached to the adhesive (figure 5, col. 7, lines 6-10).

Regarding claim 7: Baldwin discloses a clear label material with a pigmented adhesive 28 on a back side, and an RF transponder 66 adhered to the adhesive (col. 7, lines 6-10). Baldwin does not disclose the separation of the tag from a substrate results in incomplete separation of the adhesive in the form of the silicone pattern and the pattern becomes visible as claimed. However, However, the AAPA teaches the separation of the tag from a substrate results in incomplete separation of the adhesive in the form of the silicone pattern and the pattern becomes visible (specification, page 3). Therefore, it would have been obvious to the skill artisan to use the conventional tamper-indicating label as an alternative way for purpose of indicating tampering which is an advantage because it's commercially available in the market.

Regarding claim 8: AAPA teaches the tamper evident label material is one of 3M 7866,
3M 7389 and 3M 7385 (specification, page 3).

Regarding claim 14: Baldwin discloses a release liner 58 attached to the adhesive (figure 5, col. 7, lines 6-10).

Regarding claim 17: Baldwin discloses a release liner 58 attached to the adhesive (figure 5, col. 7, lines 6-10).

Regarding claim 18: Refer to claim 17 above.

3. Claims 5, 6, 9, 10, 15, 16, 19, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baldwin in view of AAPA and further in view of Mandecki (U.S. Pat. 5,981,166).

Application/Control Number: 10/092,174

Art Unit: 2632

Regarding claim 5: The combination does not disclose a hologram on the label material.

Page 4

However, Mandecki discloses a screening of soluble chemical compounds for their

pharmacological properties utilizing transponders comprising the holographic encoding of an

image of serial number (col. 4, lines 57-64). Therefore, it would have been obvious to one of

ordinary skill in the art at the time the invention was made to utilize the teaching of Mandecki in

the system of Baldwin and AAPA because they teach a system for security purpose which uses a

transponder for transmission of data by reception of a predetermined signal. It is seen that using

of holographic images would be an advantage for protecting articles from theft and for

authenticating them.

Regarding claim 6: Mandecki discloses microprinting on the label material (col. 4, lines

55-57).

Regarding claim 9: Refer to claim 5 above.

Regarding claim 10: Refer to claim 6 above.

Regarding claim 15: Refer to claim 5 above.

Regarding claim 16: Refer to claim 6 above.

Regarding claim 19: Refer to claim 5 above.

Regarding claim 20: Refer to claim 6 above.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Phung T Nguyen whose telephone number is 703-308-6252. The

examiner can normally be reached on 8:00am-5:30pm Mon thru. Friday, with alternate Friday

off.

Application/Control Number: 10/092,174

Art Unit: 2632

Page 5

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel J. Wu can be reached on 703-308-6730. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9314 for regular communications and 703-308-9051 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.

Examiner: Phung Nguyen
